Collaborative, Full Stack Developer driven to execute goal-oriented projects. Passionate about coding and experienced working with interdisciplinary teams. Looking forward to creating responsive, fast and interactive websites for great user experience within a product-based company.

TECHNICAL SKILLS

- HTML, CSS and JavaScript.
- React JS
- Redux JS
- Material UI and Bootstrap
- Node JS and Express JS
- Mongo DB
- DSA
- Git
- Postman
- Firebase

SOFT SKILLS

- Remote and Team work
- Work Ethic
- Adaptability

LANGUAGES

- English
- Hindi
- Telugu

ACCOMPLISHMENTS

- Received certification on python workshop during the college.
- Won 1st prize in a technical quiz at collage level competition.

PROJECTS

Tripvillas

A website where the users can book hotels and resorts for holiday destinations.

- A collaborative team project with a size of 3 members achieved the outcome in 2 weeks.
- My role in the project is to add functionalities to the web pages and make them interactive.
- Tech-Stacks used: React, Redux, React Google maps, React Thunk, Styled Components, Material UI, and Mongo DB.
- Features: Login, Search according to filters, Check-in and Check-out, Hotel booking, and Payment.

Hubspot

A project where users can log in and explore our website which is fully functional and experience some cool features.

- It is a team project with a size of 4 members and achieved the outcome in 5 days.
- I have used some libraries like Font Awesome Icons and Google Fonts to design web pages.
- Tech-Stack used: HTML, CSS JavaScript, and LocalStorage.
- Features: Authorized Login, Dynamic data, and Dashboard.

Campaign Monitor

A small website that focuses on the design and added some functionalities.

- Duration: 04 days
- Tech-Stack used: HTML, CSS, JavaScript.
- Features: Navigate through different pages which provide dynamic data.
